

18 November 2003

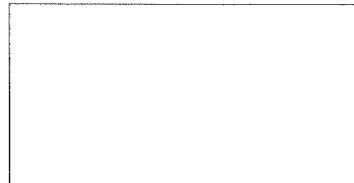

MEMORANDUM FOR THE RECORD

SUBJECT: [redacted] Death of Iraqi Detainee

1. [redacted]
[redacted] Office of the Armed Forces Medical
Examiner, Deputy Medical Examiner CDR [redacted]
1413 Research Blvd, Building 102, Rockville, MD. The purpose of the meeting was
to discuss the autopsy of Iraqi detainee Manadal Al-Jamaidi (Subject), [redacted]
performed in Baghdad circa 9 November 2003.

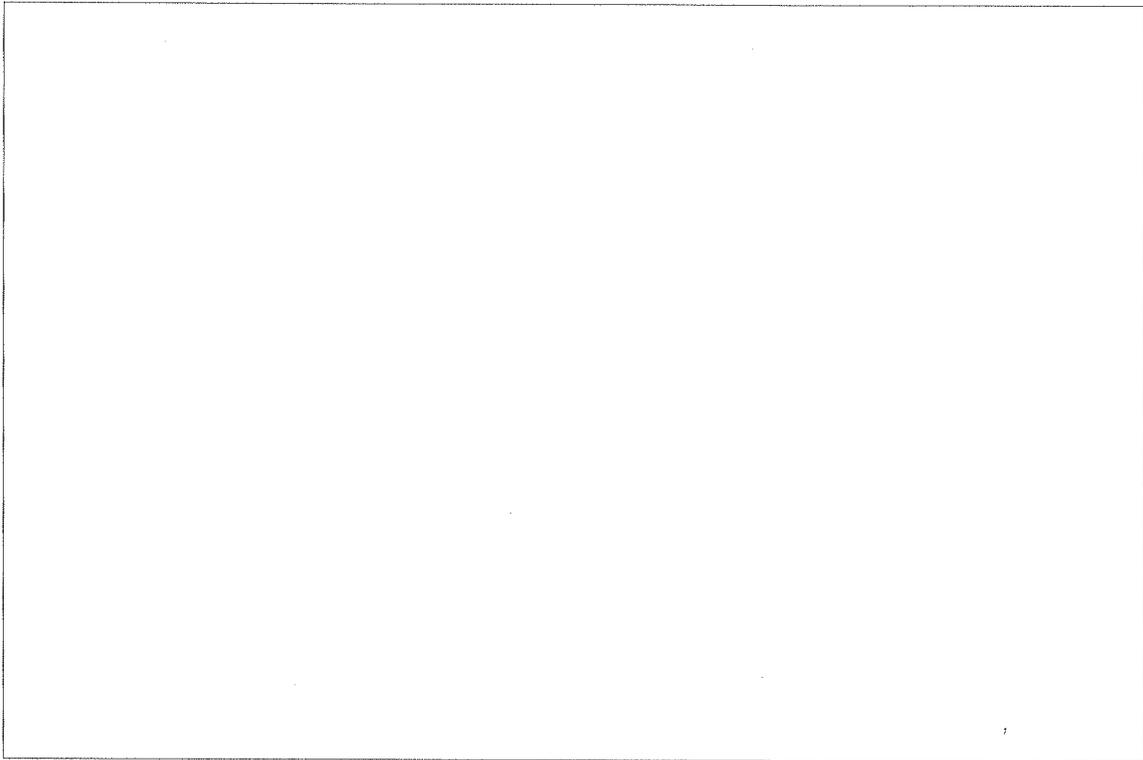

2. (U//FOUO) [redacted]
[redacted]

3. (U//FOUO) [redacted] described his preliminary findings as follows:
- The Subject's right eye was blackened, however there was no resulting skull fracture.
 - There were bruises over both temporal regions that were not apparent until the scalp was lifted.
 - The Subject's neck and spine were normal.
 - The brain was "negative," i.e., no evidence of contusion or hemorrhaging.
 - There was a contusion to the lower lip that was minor.
 - There was evidence of blunt force to both chest cavities. Three left ribs and two right ribs were fractured, which [redacted] noted would be unusual if resulting from CPR on a person of Subject's age and condition.
 - There were abrasions on both knees. [redacted] noted that these and other abrasions were apparent on the lower extremities.
 - An "old slug" was found on x-ray in the spleen. [redacted] said it was probably from "years back" based on the surrounding tissue.

~~SECRET~~

- There was no significant natural disease evident; no sign of cardiac disease, no indication of MI, and the Subject had "good arteries."
- The Subject had contusions on the outside of the right forearm and the left wrist/hand.
- There were ligature marks on both wrists and both ankles. said he is confident that the Subject was "definitely bound." The ligature marks on the ankles were approximately 1/2" wide and extended fairly deep into the tissue. said this was not simply the result of the binding(s) being too tight.
- The Subject was examined for anal and genital trauma, which was negative.
- noted that the Subject was in good shape. He said the injuries were not consistent with the Subject being beaten to death.
