AGENT'S INVESTIGATION REPORT

ROI NUMBER

0021-08-CID579-53598

CID Regulation 195-1

FOR OFFICIAL USE ONLY Sensitive

PAGE 1 OF 2 PAGES

BASIS FOR INVESTIGATION: About 2348, 1 Apr 08, SPC [redacted] 31st CSH, Theater Internment Facility (TIF), Camp Bucca, IZ, APO AE 09375, reported Detainee MANSUR was found not breathing and subsequently died at the TIF hospital.

About 0019, 1 Apr 08, SA [redacted] coordinated with Dr. (CPT) [redacted] TIF Hospital, Camp Bucca, IZ, APO AE 09375, regarding Detainee MANSUR. Dr. (CPT) [redacted] stated the 31st CSH was notified a detainee was unconscious. When medical personnel arrived on scene, Detainee MANSUR was not breathing and had no signs of life. Cardiopulmonary resuscitation (CPR) was continued by the medics and Detainee MANSUR was given advanced resuscitation methods and subsequently transported to the 31st CSH where further resuscitation methods were conducted to no avail. About 2331, 1 Apr 08, Dr. (CPT) [redacted] pronounced Detainee MANSUR dead. Dr. (CPT) [redacted] further related Detainee MANSUR had no known history of heart related illness.

About 0024, 02 Apr 08, SA [redacted] exposed photographs of Detainee MANSUR's remains utilizing a Nikon Coolpix Digital Camera.

About 0035, 2 Apr 08, SA [redacted] and Mr. [redacted] this office interviewed Detainee [redacted] Compound Imam, Internment Serial Number (ISN) [redacted] and Detainee [redacted] Compound Chief, ISN [redacted] both interned at TIF, Camp Bucca, IZ, APO AE 09375. Detainee [redacted] stated Detainee MANSUR was found shivering in his tent and subsequently transported to the sally port where attempts were made to revive him. Detainee [redacted] and Detainee [redacted] were unaware of any medical problems with Detainee MANSUR and stated he had not made any complaints concerning his health. Additionally, Detainee MANSUR was scheduled for release from confinement.

About 0050, 2 Apr 08, SA [redacted] interviewed PO2 [redacted] PO2 [redacted] and PL1 [redacted] all assigned to the Naval Provisional Detainee Battalion 4 (NPDB4), Camp Bucca, IZ, APO AE 09375. It was determined at about 2300, 1 Apr 08, the Compound Chief, Detainee [redacted] notified the guard force that Detainee MANSUR was asleep, began to shake, and had appeared to have stopped breathing. When they arrived at the sally port of the compound, Detainee MANSUR was not breathing and had no pulse so CPR was initiated.

About 1110, 2 Apr 08, SA [redacted] and Mr. [redacted] interviewed Detainee [redacted] concerning the location in which Detainee MANSUR was found. Detainee [redacted] relayed Detainee MANSUR was found in his tent by his cousin, Detainee [redacted] ISN US [redacted] TIF, Camp Bucca, IZ, APO AE 09375.

PAGE 2 OF 2 PAGES

About 1136, 2 Apr 08, SA **(b)(6), b(7)(C)** and Mr. **(b)(6), b(7)(C)** interviewed Detainee **(b)(6), b(7)(C)**. Detainee **(b)(6), b(7)(C)** stated Detainee MANSUR had been asleep for approximately 15 minutes when he began to shake. Detainee **(b)(6), b(7)(C)** picked up Detainee MANSUR's foot and let it drop in an attempt to get a response, pushed on his chest and observed no breathing. Detainee **(b)(6), b(7)(C)** assisted in transporting Detainee MANSUR to the sally port. Detainee **(b)(6), b(7)(C)** related he was unaware of heart related problems or medical issues pertaining to Detainee MANSUR.

About 0950, 7 Apr 08, SA **(b)(6), b(7)(C)** coordinated with SPC **(b)(6), b(7)(C)** TIF Hospital, Camp Bucca, IZ, APO AE 09375, and obtained all medical records pertaining to Detainee MANSUR.

About 0630, 11 Apr 08, SA **(b)(6), b(7)(C)** interviewed SPC **(b)(6), b(7)(C)** and SPC **(b)(6), b(7)(C)** both assigned to Task Force 31, Camp Bucca, IZ, APO AE 09375, concerning their involvement in regards to the death of Detainee MANSUR. About 2303, 1 Apr 08, they were dispatched to the compound and upon arrival began CPR. SPC **(b)(6), b(7)(C)** and SPC **(b)(6), b(7)(C)** then transported Detainee MANSUR to the TIF Hospital. ///LAST ENTRY///

AGENT'S INVESTIGATION REPORT

CID Regulation 195-1

ROI NUMBER

0021-08-CID579-53598

PAGE 1 OF 2 PAGES

DEATH SCENE EXAMINATION: Between 1200 and 1230, 2 Apr 08, SA **(b)(6), (b)(7)(C)** conducted a death scene examination of compound 19C, Theater Internment Facility (TIF), Camp Bucca, APO AE 09375. Due to security concerns, an examination was only able to be done from the exterior of the compound and not the tent in which Detainee MANSUR was discovered.

N=North S=South E=East W=West E/E=Entry/Exit way

CHARACTERISTICS OF THE SCENE: Compound 19C was rectangular in shape and contained eight detainee tents. Each tent housed approximately 32 detainees. Compound 19C also consisted of a water closet and command shack on the northern most portion of the compound. The ground of the compound was mostly sand with areas of hardened rock. There were concrete slabs under each tent used as a foundation for the tent structures. The compound was surrounded by a chain link fence with barbed wire along the top of the fence. There was a guard tower in the SW corner of the compound which allowed a clear view of all eight tents and the common area around the tents.

CONDITION OF SCENE: The compound was occupied at the time of the exam and contained several detainees which were residence of Compound 19C. There were two rows of tents spanning North to South with the side openings of the tents facing E and W. Each tent was evenly spaced throughout the compound and each one appeared to be level. The tents were white and tan in color, plastic and metal type construction, with circular shaped tops. The E and W side of each tents contained an E/E. Roughly centered in the compound, in the middle of the tents, was volleyball net. Outside of each tent E/E were several sandal type shoes which appeared to belong to the various detainees inside compound 19C. Roughly centered between each tent, spanning E to W, was a clothes line, which contained various items of clothing. Tent 1 was in the NE corner of the compound and the E/E's appeared to be open with no visible locking devices at the time of the examination.

ENVIRONMENTAL CONDITIONS: The outdoor temperature of the examination was approximately 90 degrees Fahrenheit with low humidity. The skies were clear and it was sunny.

FACTORS PERTINENT TO ENTRY AND EXIT: There were two E/E's to Compound 19C on the North end of the compound. There was a large closed gate used for mass entry and exit in the approximate center of the North end of the compound, a personnel gate at the north east corner of the compound and a locked gate east of the command shack leading to the compound's living area.

SCENE DOCUMENTATION: About 1215, 2 Apr 08, SA **(b)(6), (b)(7)(C)** exposed photographs of the scene utilizing a Nikon Coolpix Digital Camera. A death scene sketch was also prepared to better document the scene.

AGENT'S INVESTIGATION REPORT

CID Regulation 195-1

ROI NUMBER 0089-08-CID112

PAGE 1 OF 1 PAGE

DETAILS

BASIS FOR INVESTIGATION: On 4 Apr 08, this office received a notification from Mr. (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) Operational Investigations, Office of Armed Forces Medical Examiner (OFAME), Armed Forces Institute of Pathology (AFIP), 1413 Research Blvd, Bldg 102, Rockville, MD 20850 of the autopsy of Mr. Ziyad Hamid MANSUR, (b)(6), (b)(7)(C) Theater Internment Facility, Camp Bucca, Iraq APO AE 09375.

About 1245, 9 Apr 08, Dr. (COL) (b)(6), (b)(7)(C) Office of Armed Forces Medical Examiner (OFAME), Armed Forces Institute of Pathology (AFIP), 1413 Research Blvd, Bldg 102, Rockville, MD 20850, conducted the autopsy of Mr. MANSUR. The preliminary cause of death and the manner are pending further medical review. Photographs from AFIP exposed digital photographs of the autopsy and prepared a compact disc (CD) containing all images exposed. SA (b)(6), (b)(7)(C) obtained the fingerprints of Mr. MANSUR and a copy of the CD containing all images was obtained. (See Fingerprints and CD of Mr. MANSUR for details.)

Agent's Comment: The official results of the autopsy will be documented in the Final Autopsy Report, which will be provided upon completion. //LAST ENTRY//

CONSULTATION REPORT ON CONTRIBUTOR MATERIAL

AFIP DIAGNOSIS REPORT OF TOXICOLOGICAL EXAMINATION

Condition of Specimens: GOOD

Date of Incident: (b)(6) /2008 Date Received: 4/14/2008

CARBON MONOXIDE: The carboxyhemoglobin saturation in the blood was less than 1% as determined by spectrophotometry with a limit of quantitation of 1%. Carboxyhemoglobin saturations of 0-3% are expected for non-smokers and 3-10% for smokers. Saturations above 10% are considered elevated and are confirmed by gas chromatography.

VOLATILES: The **BLOOD AND VITREOUS FLUID** were examined for the presence of ethanol at a cutoff of 20 mg/dL. No ethanol was detected.

CYANIDE: There was no cyanide detected in the blood. The limit of quantitation for cyanide is 0.25 mg/L. Normal blood cyanide concentrations are less than 0.15 mg/L. Lethal concentrations of cyanide are greater than 3 mg/L.

DRUGS: The **BLOOD** was screened for acetaminophen, amphetamine, antidepressants, antihistamines, barbiturates, benzodiazepines, cannabinoids, chloroquine, mefloquine, cocaine, dextromethorphan, lidocaine, narcotic analgesics, opiates, phencyclidine, phenothiazines, salicylates, sympathomimetic amines and verapamil by gas chromatography, color test or immunoassay. The following drugs were detected:

None were found.

FINAL AUTOPSY REPORT

Name: BTB Mansur, Ziyad Hamid	Autopsy No.: (b)(6)
SSAN: (b)(6)	AFIP No.: (b)(6)
Date of Birth: (b)(6)	Grade: Civilian, Detainee
Date of Death: (b)(6)	Place of Death: Iraq
Date/Time of Autopsy: 09 APR 2008 @ 1100	Place of Autopsy: Dover Mortuary
Date of Report: 26 AUG 2008	Dover AFB, DE

Circumstances of Death: This 41 year-old detainee was being detained in Theater Internment Facility (TIF) Camp Bucca, when as reported, he was observed by another detainee to be shaking while sleeping. A detainee attempted to wake him and he was noted to be unresponsive. He was carried to compound guards who initiated lifesaving measures. All resuscitative measures were unsuccessful.

Authorization for Autopsy: Office of the Armed Forces Medical Examiner, IAW 10 USC 1471.

Identification: Presumptive identification via review of all accompanying paperwork. Post-mortem fingerprints taken and dental exam performed. Suitable specimen for DNA analysis obtained.

CAUSE OF DEATH: Undetermined

MANNER OF DEATH: Undetermined

FINAL AUTOPSY REPORT: (b)(6)

2

BTB Mansur, Ziyad Hamid

EXTERNAL EXAMINATION

The body is that of a well-developed, well-nourished male. The body is approximately 62 ½ inches in length, weighs 152 pounds, and appears compatible with the stated age of 41 years old. The body is cold. Lividity (faint) is fixed on the posterior surface of the body except in the areas exposed to pressure. Rigor is resolving.

The scalp hair is brown/grey with male pattern baldness. Facial hair consists of a beard. The irides are indistinct. The corneae are cloudy. There are scattered petechiae of the upper right eyelid and lower left eyelid. The remaining conjunctivae are pale with no petechiae. The sclerae are white with drying artifact. The oral cavity, external nares, and external auditory canals are free of foreign material or abnormal secretions. The lips are dry. There are no petechiae of the oral mucosa.

The chest is symmetric. The genitalia are those of a circumcised adult male. The pubic hair is shaved. The anus is atraumatic.

The upper and lower extremities are symmetric and without clubbing or edema. The fingernails are intact. On the right arm is a 1 x 1-inch scar. On the right knee is a 1 x 1-inch scar. On the left ankle at foot are multiple scars that measure up to 2 inches in maximum dimension.

CLOTHING AND PERSONAL EFFECTS

The body is clad in yellow pants, white pants, white underwear, and white t-shirt (cut). Two identification tags accompany the body.

MEDICAL INTERVENTION

No evidence of medical intervention is present on the body.

RADIOGRAPHS

A complete set of post-mortem radiographs is obtained and demonstrate a radio-opaque fragment in the right leg (metal fragment recovered from dense fibrous tissue, photographed and placed in a labeled evidence container).

EVIDENCE OF INJURY

There is no evidence of external or internal recent injury.

INTERNAL EXAMINATION**BODY CAVITIES:**

The ribs, sternum, and vertebral bodies are visibly and palpably intact. No excess fluids or adhesions are present in any of the body cavities. The organs occupy their usual anatomic positions.

HEAD (CENTRAL NERVOUS SYSTEM) and NECK:

The galeal and subgaleal soft tissues of the scalp are free of injury. There are no skull fractures. The dura mater and falx cerebri are intact. The leptomeninges are thin and delicate. The unfixed brain weighs 1380 grams and is retained for Neuropathology consultation (see Neuropathology consultation).

~~FOUO~~

10-L-0126 ACLU DDII CID ROI 21493

~~FOR OFFICIAL USE ONLY~~~~LAW ENFC~~~~SENSITIVE~~

000113

EXHIBIT 14

FINAL AUTOPSY REPORT: (b)(6)**BTB Mansur, Ziyad Hamid**

The anterior strap muscles of the neck are homogenous and red-brown without hemorrhage (by layer-wise dissection). The thyroid cartilage and hyoid bone are intact. The larynx is lined by intact white mucosa. The tongue is free of bite marks, hemorrhage, or other injuries. The thyroid is symmetric and red-brown, without cystic or nodular change. Incision and dissection of the posterior neck demonstrates no deep paracervical muscular injury and no cervical spinal column fractures.

RESPIRATORY SYSTEM:

The upper airway is clear of debris and foreign material. The mucosal surfaces are smooth, yellow-tan and unremarkable. The right and left lungs weigh 650 and 540 grams, respectively. The pulmonary parenchyma is red-purple exuding moderate amounts of blood. The pulmonary arteries are normally developed and patent without thrombus or embolus.

CARDIOVASCULAR SYSTEM:

The heart weighs 290 grams and is contained in an intact pericardial sac. The heart is retained for cardiovascular pathology consultation (see cardiovascular consultation). The aorta and its major branches arise normally and follow the usual course and are unremarkable. The vena cava and its major tributaries return to the heart in the usual distribution and are free of thrombi.

LIVER & BILIARY SYSTEM:

The 1780 gram liver has an intact, smooth capsule and a sharp anterior border. The parenchyma is tan-brown with the usual lobular architecture. In the right dome is a 3.0 x 3.0 centimeter red nodule. No other abnormalities are seen. The gallbladder contains less than 1 milliliter of bile. The extrahepatic biliary tree is patent.

SPLEEN:

The 250 gram spleen has a smooth, intact, red-purple capsule. The parenchyma is maroon with unremarkable lymphoid follicles.

PANCREAS:

The pancreas is red-tan with a lobulated appearance. No mass lesions or other abnormalities are seen.

ADRENALS:

The right and left adrenal glands are symmetric, with bright yellow cortices and red-brown medullae. No masses or areas of hemorrhage are identified.

GENITOURINARY SYSTEM:

The right and left kidneys weigh 140 and 140 grams, respectively. The external surfaces are intact and smooth. The cut surfaces are dark-red and the cortex is delineated from the medullary pyramids. The pelves are unremarkable and the ureters are normal in course and caliber. The bladder contains scant urine. The prostate and testes are unremarkable.

10-L-0126 ACLU DDII CID ROI 21494
FOR OFFICIAL USE ONLY

FINAL AUTOPSY REPORT: (b)(6)
BTB Mansur, Ziyad Hamid

FINAL AUTOPSY DIAGNOSES

- I. No evidence of significant recent trauma**
- II. Natural disease:**
 - A. Moderate dysplasia of sinoatrial nodal artery and intramural coronary arteries in crest of ventricular septum
 - B. Hemangioma of the liver
- III. Evidence of medical intervention: None**
- IV. Identifying marks: As described above**
- V. Post-mortem changes: As described above**
- VI. Toxicology (AFIP):**
 - A. VOLATILES: No ethanol detected in the blood and vitreous fluid
 - B. DRUGS: No screened drugs of abuse/medications detected in the blood
 - C. CARBON MONOXIDE: The carboxyhemoglobin saturation in the blood was less than 1%
 - D. CYANIDE: No cyanide was detected in the blood

OPINION

This 41 year-old detainee, Ziyad Hamid Mansur, was, by report, observed to be shaking while sleeping. When another person attempted to wake him, he was noted to be unresponsive. At autopsy examination, there is no evidence of recent blunt force injury, sharp force injury, or gunshot wounds. The metal fragment recovered from the right leg is consistent with remote injury. The petechiae of the eyelids are non-specific; however, asphyxia cannot be completely excluded. Cardiovascular pathology consultation was significant for dysplasia of the nodal and intramural coronary arteries. However, the correlation between sudden death and this finding in the absence of significant scarring is unclear. Microscopic examination was non-contributory. Neuropathology consultation was non-contributory. The toxicology screen was negative. With no evidence of recent injury, negative toxicology, and non-contributory microscopic examination (including the heart and brain) the cause of death is undetermined. Thus the manner of death is undetermined¹.

(b)(6) (b)(6)
 (b)(6) Medical Examiner
 26 May 08

¹ If additional information becomes available that necessitates a change in the cause and manner of death, an amendment to this report will be made.
