The exact words were "I think a POW has bee shot." I instructed my medic -Iraqi detainee was lying his back. Exposure of the wound revealed a small entry wound to the lower right back. We to grab my aid bag and we ran to the guard house where the detainees were held and myself) bandaged the wound, stabilized the patient, and requested an escort of MP's in a non-standard vehicle for patient evacuation. Dust-off was also requested in case it was needed. The patient was stable upon leaving the B/3-67 AA via MP non-standard evac HMMWV and MP escort vehicles. Patient was evacuated to Baqubah airfield to E 204th Medical Company. It was determined that an exit wound existed in the thigh and re-entry into the ankle superficially. The bullet was not distorted suggesting no bone contact. The angle of the exit wounds suggests the weapon was pointed in a downward direction. Nothing follows 6.4 67c4 10. EXHIBIT  $\subset$ 11.
