28. Describe any unit training or other programs that you are aware of that teach leaders and Soldiers how to recognize and resolve combat stress. FM 22-51, para 11-5. Prevention of Misconduct Stress Behaviors. The measures which reduce battle fatigue and prevent battle fatigue casualties should also help reduce the incidence of misconduct stress behaviors. However, additional actions also need to be practiced consistently by leadership at all echelons and by buddies at the small unit level. FM 22-51, para 1-3, Stress control requires special involvement from direct (small unit) leaders. The responsibility extends up through the organizational leaders and their staffs (both officers and noncommissioned officers [NCOs]) at all echelons. Appendix A describes combat stress risk factors and prescribes leaders' actions to control them. Leaders, staffs, and individual soldiers all receive assistance from the supporting chaplains, the medical personnel, and combat stress control/mental health personnel (see Appendix B for information pertaining to combat stress control units). If any link in the chain of responsibility is weak, it is the responsibility of the other members of the chain to strengthen it. FM 8-51, para 1-1, b. Responsibility For Stress Control. Control of stress is the commander's
responsibility (see FM 22-51) at all echelons. The commander is aided in this responsibility by the
noncommissioned officer (NCO) chain of support; the chaplaincy; unit medical personnel; general,
principal, and special staff, and by specialized Army CSC units and mental health personnel. )
