(b)(1)

FYI, I met w/ine an anti-structure with this morning on another matter and they confirmed there were no incidences investigated or under investigation involving DHS personnel misconduct. There were two investigations, however, that involve me—the form ssue; and a detained incident while I was J2X in 12. Neither one is a concern as I'm not the subject of the investigation and have only langential involvement via a statement given in support of the investigation. They stressed there is no/no need for DHS concern on this. They equested any knowledge of this investigation be very, very close hold.
