Determining Truth from Fiction

CON: Personal Vendettas against different ethnic groups caused influx of bogus reporting from interrogators and S2's created litmus test before acting on reports. However, once you found someone giving info on their own clan/ethnic group (Kurd on Kurd or Arab on Arab) report by itself held more weight.

LESSON: Tactical patience is critical when taking detainees. Host nation personnel during SASO. It's more of an Art than a Science, and usually learned after the unit has made mistakes.

Detainees lost in the system due to number/misspelling

Arabic Names

Tracking Detainees above division and retrieving interrogation reports was very difficult

No routine system for the Iraqi public to contact detainees or status of loved one within the system

RECOMMENDATION:

PW Tag number is the sole tracking device (needs to be automated down to platoon level)

Database management within the AOR

Use EPW Tag (portion C) as a hand receipt for family members. Provide local police with roll up of detainees. Citizens show card to police and receive detainee status. Facilitate communication through red crescent/red cross mailbox at the detention station

Clarification of detainee tracking responsibilities across the theater (is the S1 the right choice by doctrine?)

detainee review/release procedures at BDE level.

CON: 3BCT's review process prevented
any incarcerations and inadvertent release of
of intelligence value. At times a detainee from one
sector affected working relationships with host nation
in other sectors within the 3BCT and or Division
The review process enhanced the BDE Cdr's ability to
and maintain order throughout the AO.

RECOMMENDATION: Processing detainees for release or
