Received a call from [REDACTED] (CITF) today regarding a letter ACID received from FBIHQ (DAD [REDACTED] detailing three incidents where FBI agents have reported they observed detainees being abused at GTMO. Two of the incidents appear to have been witnessed from observation rooms and it was unclear how the other incident was witnessed. No known DON involvement and no indications that any CITF or NCIS personnel witnessed this activity. One incident involves an enlisted member (probably Army), another a DIA employee named [REDACTED] and the third, a dog and a detainee #63.

ACID intends to refer the matter to SOUTHCOM, but it may be one that is directed to NCIS, so I wanted to give everyone a heads up.

FYI...
