Title: COUNTERTERRORISM DIVISION, GTMO,  
INSPECTION SPECIAL INQUIRY  
FOR SPECIAL AGENT (SA) APPLICANTS

Synopsis: Report of negative observation of aggressive treatment, interrogations or interview techniques on GTMO detainees.

Details: This EC is in response to email of July 9, 2004 from Steven C. McCraw to all individuals identified as having conducted an assignment at GTMO, Cuba since 09/11/2001.

I was on TDY assignment to GTMO, Cuba for the Military Detainee Liaison Unit (MDLU) from September 1, 2003 through November 11, 2003. During this time frame I was assigned to participate in interviews of the detainees being held at GTMO. During my assignment I did not observe any aggressive treatment or aggressive interrogation or interview techniques of detainees at GTMO.

During my assignment at GTMO I received a briefing from the military personnel assigned to operations at GTMO, that non-cooperative detainees could be placed on a list for a specific interrogation technique involving interruption of sleep pattern, called the "frequent flyer program." With this particular technique, identified detainees were moved frequently from cell block to cell block at intervals that appeared to be every hour or every two hours depending on the shifts and availability of military personnel to move the detainee. Detainees were moved along with all of their personal belongings. Due to the movement

to different cells the detainees had their sleep interrupted throughout a 24 hour period. The duration of the program for particular detainees seemed to depend on the cooperativeness of the detainee. I did not participate in this program and do not know of any participation of FBI personnel in recommending detainees to this program. I did observe on the detainee movement database, some detainees were on the movement records, moving approximately every hour or every two hours. I do not recall the names of these detainees.
