ROTATION 6 WELCOME ABOARD PACKET

Welcome to the Baghdad Operations Center (BOC). The below listed information has been compiled to assist you in the transition to life at BOC. You will be receiving more information at the Thursday evening all-hands meeting, however, here is some information that you may find helpful in advance of the all-hands meeting.

BOC MISSION STATEMENT **

Within the Iraqi Theater of Operations (ITO), take deliberate and carefully planned actions to protect the United States against terrorist attack and espionage activity by engaging in intelligence gathering activities, including high value detainee interviews, document exploitation, biometric processing and other activities as directed.

As required, support Coalition Provisional Authority (CPA) efforts to address acts of terrorism within Iraq to include processing of bombing and other crime scenes, forensic examinations and follow-up investigations.

Appropriately disseminate and share intelligence information gathered through the above activities with other FBI entities, U.S. agencies and military units, and when properly approved, with our foreign government partners.

Do all of the above only after required planning and approval. Working with Hostage Rescue Team and Baghdad Operations Center managers, make certain all activities are conducted in as safe a manner as possible.

** Awaiting final approval from FBIHQ

MUST READ

This info will get you through the night so read this now.

- The water from the tap is NOT potable. That means no drinking and no brushing your teeth with it. Use bottled water. There is plenty of it.

- Do not put ANYTHING solid into the toilets. If you need to defecate use the pot-a-johns located just outside the front door to the left.

- The water supply is limited (especially the hot water). To conserve water take "navy" showers. Use the water to get wet and rinse, otherwise shut it off.

- There are some unsecured hot wires in the building. Do not touch them.

FBI009389OGC

GENERAL RULES:

-Alcohol: Responsible drinking is authorized in the BOC. Alcohol is permitted in all common areas with the exception of the Operations Center.

-Noise: Due to the varying nature of work schedules, all employees should be respectful of those working and sleeping no matter the time of day. Quiet hours have been established in the common areas between the operations center and the sleep areas between 2200 and 0700 hours. Music is not authorized in the Operations Center. Personal headphones may be used. Music can be played in all other common areas.

-Communications: Ensure that when you depart BOC you have a comm plan. On BIAP, the primary method is HT and alternate is cell phone. Outside BIAP, cell phones are required. There is a limited number of cell phones so if you do not NEED one do not take one. We are in the process of improving the communications systems outside of BIAP. All hands will be apprized of our progress

- Computer Usage: You will be receiving a class regarding log-on procedures and server operations on Thursday. Remember to always save your files on the BOC server and NOT on the individual desktops.
