Mr. Harrington - FBI-GTMO reviewed the MM and HQ control files this morning. The only document we found that is pertinent to the issues under review is the 5/30/03 EC, drafted by SSA [REDACTED] BAU, which everyone is aware of, which discusses interview/interrogation techniques in detail.

I think I've heard this several times, but let me ask one more time:

Has there been any written guidance given to FBI agents in either GTMO or Iraq about when they should "stand clear" b/c of the interrogation techniques being used by DOD or DHS or the Agency?

Has there been any written guidance given to FBI agents along the lines of: DOD/DHS/CIA is authorized to use a, b and c techniques when interrogating detainees. To the extent you become aware (either personally or through subsequent interrogation of a detainee) of anyone using techniques other than a, b and c, you should notify Mr. X?
