To: Date: Sat, May 4, 2002 4:48 PM Subject: DoD REQUEST FOR BA/U SUPPORT Subject: By way introduction, I am currently assigned TDY at Guantanamo Bay, Cuba, to address the GTMO INTEL PROJECT. We have a key and close working relationship with DoD, specifically JTF-170. Do has designated JTF-170 as the command responsible for developing intelligence from the detainees. Two (2) issues or requests have been raised by DoD and your units were identified as possible POCs: 1) DoD at GTMO is looking to renovate eight (8) town homes to house highly cooperative detainees. The town homes will house one detainee each with the appropriate security personnel. DoD plans to renovate existing town homes near Camp Delta, where the main detainee population is being held. The purpose of this project is to provide a living and working environment to foster and reward, to some extent, the detainees' continued cooperation. In addition, once known to the general population, it is believed that it may also provide an incentive for others to cooperate. Presently, there are no measur available to DoD at GTMO to segregate and house cooperative detainees, short of placing them in isolation - which, at GTMO, is a negative re-enforcer. With that being said, DoD is looking to furnish the town homes with "culturally correct," - if you will -, colors, floorings and furnishings. Keeping in mind that the current detainee population are generally for the colors.	Intel D he

isolation - which, at GTMO, is a negative re-enforcer. With that being said, DoD is looking to furnish the town homes with "culturally correct," - if you will -, or colors, floorings and furnishings. Keeping in mind that the current detained population are generally fit	
the Middle East, North Africa and Central Asia, this may change in the future to include those of the South Pacific. In addition, DoD plans to make this compound a "fenceless" facility - with the appropria security elements along the facility's perimeter of the facility. So, DoD is also interested in monitoring devices - equipped with G.P.S to monitor the detainees' movements.	
REQUEST: Do you or do you know of someone within the FBI who may be able to assist DoD at GTM	<u>/</u> O
(S) with this project ? Apparently thus, they have turned to the FBI. This maybe an opportunity, if we posses] s . b1
the experts, to runner demonstrate the FBI's broad base of experience. DoD has set aside \$2.4 mil to complete this project and they expect to break ground within the month.	
2) The INTEL OFFICER for JTF-170, Lt. Col. BUIKEMA, is extremely interested in further developing	\mathcal{U} .
the interrogation process at GTMO. On behalf of the DoD command staff at GTMO, he has expresse keen interest in any new technological advancements that may assist in this endeavor. Moreover, he	da 🕖
also interested in any new developments in interrogation techniques that may be more effective on ou	ır 📑 🛂
target audience. One advancement mentioned by HQ, was the use of the polygraph that also monito	rs 🧳
brain wave activity. In regards to the polygraph, GTMO has requested that UC Band along with Dr. Andrews travel to GTMO in the near future to brief JTF-170 in the use of this technique.	
Andrew Ryan -Dop Polygroph School - chet resembler of poly REQUEST: Do you have any ideas or know of advancements in interrogation techniques/technology	reserve
that may benefit DoD and the FBI's GTMO INTEL PROJECT?	most
