"In the name of God who is Merciful

One day I was sleeping in my isolation room. All of a sudden I saw three American police officers. One had glasses on his face, he came towards my room and told me to get out of bed and I got up from the bed, got handcuffed and taken out of my cell #5 towards the hall. Next I saw two dogs were with them. They sent the dogs towards me. I was scared. The first dog bit my leg and injured me there and this was bad luck. The bite from the first dog caused me to have 12 stitches from the doctor of my left leg as a result I lost a lot of blood, which caused me to be weak. I didn't know anything because of weakness and I was afraid. I was holding myself when the dog was sent to me. The second bite injured my right leg severely and caused a lot of bleeding. I was laying on my side, and the soldier rolled me over. When I got up I saw there was a lot of blood in the hall. When I was planning on getting up from the floor, one of the American soldiers, who had glasses on his face and had blond hair, came towards me and hit me with his foot. He hit me hard in my face, towards my eyes, which caused me so much pain on my eyes and then he picked me up from the floor, and then put me back on the floor. The next soldier hit me on my head with his boot and he told me "This is the second time I told you to get up", and then he hit me in my balls with his boot. And because of the pain, I fell on the floor. And the next thing I saw was they picked me up from the floor by my hair and then hit my head back on the ground. And all I saw was his boot hitting my face and my mouth. The person who had the biggest boot hit me hard on my stomach and now it's been about three months since, and I still have pain. And when I go to the bathroom, I think I urinate blood. And also I have sharp pain in my balls. And after all those stitches, the doctor told me to go to my room on my chest. And then one week I was sleeping without blankets and clothes."
