NON-RECORD

This email will provide you with an update of the inquiry. As you are aware, an email was sent out to all personnel who had served in any capacity at GTMO since 9/11/2001. This email required personnel to respond to INSD and advise if they observed any aggressive treatment of detainees by either DOD or FBI personnel. Those employees who in fact did observe what they perceived to be mistreatment were to email INSD, provide a short summary of what they observed and be available for a followup interview. Those employees who did not observe any mistreatment were required to document their observation in an EC format.

There were 530 employees who have served in some capacity at GTMO and were notified by email. To date, 478 have responded. Some employees have since retired and others were contractors no longer employed with the Bureau. Of the 478 responses, there were 26 employees who stated they observed what was believed to be some form of mistreatment. These 26 employees provided summaries of what they actually observed. There were no observations of any mistreatment of detainees by FBI personnel.

The 26 summaries were provided to General Counsel Caproni, who reviewed each and ascertained that nine of the respondents would require a followup interview. The remaining 17 were deemed to be appropriate DOD approved interrogation techniques.

These nine employees will be interviewed utilizing a set of questions prepared by INSD/CTD and approved by General Counsel Caproni. The questions are attached to this email for your review. The interviews will be conducted this week and be documented via FD-302s. Subsequent to the interviews, a report will be completed and forwarded to General Counsel Caproni, who in turn will notify DOD. I will also forward CTD a copy of the report.
